

ECF4CLIM Project Questionnaire 2022

ECF4CLIM

A EUROPEAN COMPETENCE FRAMEWORK FOR A LOW CARBON ECONOMY AND SUSTAINABILITY THROUGH EDUCATION

Acting now for climate and life sustainability!

The present questionnaire aims to collect data to provide a better understanding the individual mobility and the consumption patterns of the school community. Knowing the school community's behaviour will improve our potential of acting in future improvement measures. We invite the entire school community (students, teachers, and staff) to answer a set of short questions about these topics.

There are two main parts, the section A "mobility", and the section B "students consumption". Please, answer with veracity, this questionnaire is anonymous and there aren't incorrect answers.

Thanks for your essential participation!
